

DIGITAL TIME SWITCHES

SYSTEM VERSION

With talento smart, Grässlin offers a future-proof system solution for digital time switch technology. The modular platform combines high flexibility with convenient operation and central control. Ideal for operators of multiple department stores, branches, or gas station chains, for example for advertising displays or shop window lighting.

The system version enables convenient management and programming of large applications from any location worldwide.

All digital time switches at a glance:

talento smart LAN

Digital timers
 SYSTEM VERSION

DIGITAL TIME SWITCHES

SYSTEM VERSION

With the talento smart system, customers benefit from all advantages, e.g.:

- ▶ Cost minimization through remote access
- ▶ Central coordination
- ▶ Location-independent programming worldwide
- ▶ Simultaneous uploading of new configurations at all branches or locations
- ▶ Increased efficiency for the customer
- ▶ Independent of available installers

S25, CE2 & LAN MODULE

NETWORKED, EXPANDABLE, ALWAYS UNDER CONTROL

The **S25** serves as the central system device, which together with **CE2 extension modules** enables a flexible, expandable control system. In theory, an unlimited number of systems can be reliably managed across locations. The **LAN module** complements the system with cloud and remote access, so that changes can be implemented centrally and in real time. Ideal for companies, branch networks or complex applications where maximum flexibility, control and efficiency are required.

GROUPING FUNCTION

TALENTO SMART

The grouping function of talento smart makes it possible to intelligently group and control multiple time switches or connected devices together. This simplifies the management of complex applications and saves time in programming and operation.

- ▶ Switching entire groups on and off simultaneously
- ▶ Time savings in programming and operation
- ▶ Flexible grouping by room or function
- ▶ Combination with schedules and scenarios
- ▶ Expandable for private and industrial applications

This is how you benefit from talento smart LAN

- ▶ **Central control:** With talento smart LAN, Grässlin offers a future-proof system solution for digital time switch technology. The modular platform combines high flexibility with convenient operation and central control. Ideal for companies with multiple locations, branch operations, and demanding applications.
- ▶ **Convenient programming even without remote access:** Setting possible on PC, via app, or on the device. Programs can be created in advance and, for example, sent to installers.
- ▶ **Clever system design:** talento smart devices can be connected to each other via Bluetooth. The system grows with your requirements up to 40 channels.
- ▶ **Practical remote access:** Programs and changes are centrally transmitted to all locations via LAN or cloud. Cross-location groups save time, costs, and resources.

System time switch with annual program

talento smart S25

- ▶ 2 channels, expandable up to 8 channels
- ▶ Weekly, annual and astro program
- ▶ On/off, pulse, cycle and random functions
- ▶ App and Bluetooth programming
- ▶ Art. No. 43.04.0001.1

Expansion module for building a system

talento smart CE2

- ▶ 2 channels
- ▶ Up to 3 talento smart CE2 can be connected to a talento smart S25
- ▶ App programming
- ▶ Art. No. 43.04.0004.1

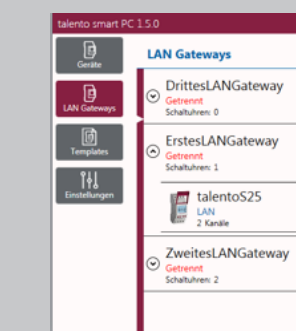

LAN module for remote access

talento smart LAN

- ▶ App programming
- ▶ Up to 5 talento smart S25 can be connected to a LAN
- ▶ System with up to 40 channels possible
- ▶ Central, cross-location configuration
- ▶ Art. No. 43.04.0006.1
