## Time switch technology

Digital Astro time switches, DIN-rail, annual program

## Description

Digital Astro distributor time switch with 500 memory locations for creating 50 date-dependent programs (ON, OFF, cycle, pulse, random ON, random OFF) and 50 date-independent programs ( 0 N , OFF, cycle, pulse, random ON, random OFF) with a shortest switching time of 1 minute ( ON -0FF) or 1 second (cycle, pulse). Free week day block formation. Summer-winter time changeovers can take place automatically, on a specific date or can even be deactivated. 12/24 h setting. Switching status indicator.
Built-in hour counter with service function.

Manual switch: automatic mode, fixed ON/OFF, override. White display lighting for better legibility. Non-volatile memory (EEPROM) for backing up programs in the event of a power failure. Batterybased power reserve for up to eight years. The time switch is sealable and can be PIN-protected against unwanted access. Programming takes place either directly on the switch itself or via convenient remote programming using mobile devices and corresponding apps (Android and iOS) and suitable PC software.
